| Thursday, April 2 | <p><b>MOUNTAINS AND THE WEATHER!!</b></p> <p>Q: How does the weather affect land use at the mountains?</p> <p>Ans: Sun affects the sides of mountains differently, one side may be shadows and other n sun shine. Also, because cold air is heavier than warm air. That's why the orchards and vegetation is done on the sides of the mountain and not in the bottom of the valley.</p> | <p>Geo success 4</p> <p>Work is to be done on notebook.</p> |
| Friday, April 3   | <p><b>Q: Define Weathering.</b></p> <p><b>Weathering</b> is the breaking down of <u>rocks</u> <u>soil</u>, and <u>minerals</u> as well as wood and artificial materials through contact with the <u>Earth's atmosphere</u>, water, and biological organisms.</p>                                                                                                                        | <p>Geo success 4</p> <p>Work is to be done on notebook</p>  |
